Prof. Dr. Valentina Balas, Aurel Vlaicu University of Arad, Romania (email: balas@drbalas.ro)

Session description

This special session deals with the problem of decision making in autonomous systems.

Autonomous systems are gaining ground in everyday applications. Despite their many known advantages, the safety risks cannot be overlooked. Articles on the subject of decision-making and its influenceability, safety and justification are invited for this special section.

Our aim is to highlight not only the benefits of using autonomous systems, but also the safety issues they pose, so that we can create more reliable systems.

The topics of interest include, but are not limited to:

- Autonomous systems in self-driving vehicles
- Autonomous systems in healthcare
- Autonomous systems in world of IoT
- Autonomous systems in smart home
- Autonomous systems in smart devices
- Autonomous systems in security protection
